**Subject:** Microsoft Settlement

Dear Sirs,

You must be joking or have very serious campaign contributions lined up if you think that the Microsoft settlement is fair and just. I have been a software engineer for 25 years and have used MS development products from the beginning.  
All the bad things people say about them is true.

They do not innovate - they stifle. Many times I have tried to do things that MS software does only to be told by their support that it can't be done. Their newest offering, XP, is not just more of the same - it is worse. They want to 'own' the software world and with your help they probably will.
